

HDMI Extender

LKV-383
HDMI HDbiT IP TX/RX
Extender CAT5 con IR (120m)

NEW

LKV-383RX
HDMI HDbiT IP Ricevitore

LKV383 HDbiT HDMI Extender trasmette u segnale HD 1080P HDMI fino a 120m. Supporta ampliamento con dispositivi di rete, compatibile con la rete esistente. Regolazione automatica intelligente in funzione della lunghezza del cavo. Controllo IR della sorgente.

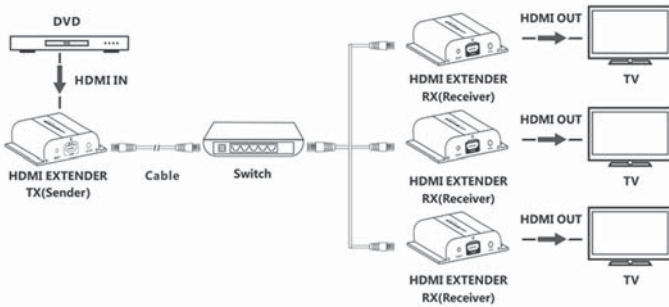

120 Meters Lossless Transmit

Break through the limitation, cost-effective solution for A/V integration
LKV383 converts the HDMI signal to standard network signal and transfer by CAT5e/6 cable to make the transmission distance up to 120 meters(394ft), accurate compression technology to realized pixel-by-pixel identical display.

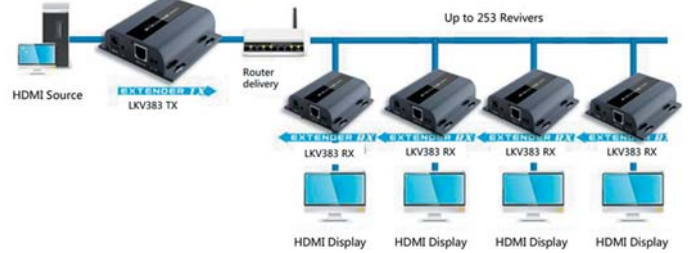

Caratteristiche

- 1) 120m Extender HDMI su IP con IR pass-through
- 2) HDMI extender di segnale su singolo cavo CAT5/5e/6
- 3) Estensione LAN da router/switch
- 4) Compatibile con la rete esistente
- 5) Plug and play

Extend and Split Unlimitedly

Using existing network devices, realize infinite extend & hundreds of split
LKV383 is unique in that it leverages HDbiT® support of long-distance transmission of HDMI signals, allows to be distributed by network routers or switchers for cascade connection, to be used both as the HDMI splitter and extender.

IR Signal Transmission

Control the source device at a secondary location

Infrared Radiation pass-through compatible, allow source device to recognize remote commands at a secondary location, supports standard 20~60KHz IR devices.
