Description

LKV380 High Performance HDBiT HDMI over power line extender allow you to transmit 1080P HDMI signals anywhere in your home using existing Power Line cable, saving you the hassles of rewiring. It is a lower cost alternative to professional AV installation.

1. Innovative HDBiT transmission technology over power line
2. Support 1080P High-definition video, whole house coverage transmission.
3. No need rewiring, where there is power line, there is HDMI signal.
4. Compatible with 100-240V AC grid, can be used globally.
5. More stable and further transmission without radiation, easy to go through walls.
6. Innovative IR pass back function , perfect improved infrared remote control experience.
7. Automatically scan and pairing, no manual settings, plug and play.
8. Using the technology of AES encryption to ensure confidentiality of the data;
9. Build in HDMI loop out, simultaneously output local display and remote display.

[HDMI Signals over Power Line](#)

Affordable and flexible high performance

Extend high-definition AV signals to HDTV anywhere in your home without running wires between rooms. Just use your home's electrical wiring to create a long distance of HDMI digital AV signal transmission solution.

1080P High Performance

Ideal for long distance HD video streaming

High performance transmitter sends the highest quality and smooth HD signal available up to 1080p right through your existing house wiring using existing outlets, which mean no more messy wires.

Easy Plug-and-play Setup

As easy as plugging in a lamp.

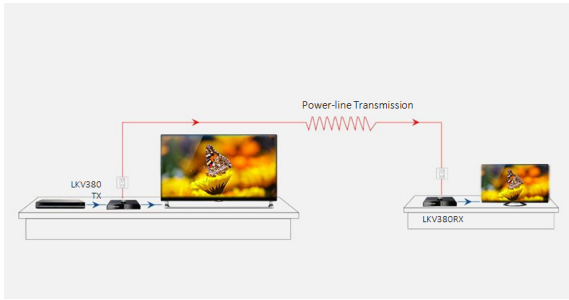

Simply plug the transmitter and receiver kits into your electrical outlets. Receiver is easily connected to your HDTV or Projector via HDMI cable while HDMI source directly to the transmitter. No tools needed. No holes in your walls.

HDMI Loop-out for Local Display

Seamless local preview and remote display

This extender provides an HDMI local display output for monitoring function to ensure High-definition digital signals are perfectly transmitted in different locations.

IR Signal Transmission

Control HDMI source devices remotely

The included extender allows you to control your media device from any area of the home. Change channels, pause your movie, adjust volume - any function will work. Simply point your remote control at the receiver and press your remote control's button - it's that easy.
